

# Biddenham

International School & Sports College

Principal: Mr David Bailey

Head of School: Ms Eleanor Grylls

November 2023

Dear Parent/Carer

I hope you found the Bedrock learning evening and letter useful to support your understanding of the platform to spark conversations at home.

Our second instalment of information as a follow up from parental engagement evening and this from the Maths department;

## **Will my child remain in their current set for maths?**

At the end of every half term students carry out a topic test that will enable them to move groups. We try our best to only move students up to avoid issues around self esteem but if we feel that this is being impacted we will move your child down. These set changes will be communicated to you through text message.

## **When can we expect homework in maths?**

Homework in maths is set regularly and is visible on their google classroom they are set on their last maths lesson of the week. They are set as electronic copies but students also receive paper copies. The focus of the homework is retrieval practice to ensure knowledge from the lesson is embedded.

## **What support is available so I can help my child with maths at home?**

Supporting your child at home with maths can be tricky for some parents, methods of working out change overtime and this can be frustrating at home when you can't support yourself. The maths department invests in online books through Kerboodle and your child is confident in using these in lessons. They simply login using google sign in. If you would like more information about this please click on this link: <https://youtu.be/1U-zUnPBuOY>

## **Resources in lessons are either too challenging or too easy for my child**

We were made aware of parent/carers events that some students were struggling with the challenge of some of the tasks whilst finding some very easy. The maths department has worked hard to produce resources that have been adapted this year to introduce some maths topics earlier than they would have typically done in the past. This is due to the variety of abilities in this group in order for students to plug gaps in learning/ understanding.

The beauty of the smaller groups is that teachers of these groups work closely with your child and will adapt the resources based on the knowledge they have retained and offer resources that can either speed up the pace of learning through extension tasks or slow it down whilst feeling like they are still part of the class.

We are looking at building breakout groups into these lessons using the additional adults in the room.
